

# RED ARC LIGHT

Enhance visibility and safety for both operators and pedestrians in your warehouse with the Forklift Red Arc Light.

Install these lights in all facilities where pedestrians and forklifts mingle. They precede forklifts to warn pedestrians of approaching traffic, even at difficult intersections.

This compact lighting solution ensures optimal illumination, reducing the risk of accidents during night shifts or in low-light environments.

# PRODUCT SPECIFICATIONS

- 40 Watts OSRAM LEDs
- DC 10 - 80 Volts Wide Voltages
- Operating Temp -40°C to +60°C
- 50000 Hours Lifespan
- Aluminum Die Cast Housing
